PART 1 : COLLATION SEQUENCE

FOREWORD

This standard was approved by the Sectoral Committee on Information Technology and was authorised for adoption and publication as a Sri Lanka Standard by the Council of the Sri Lanka Standards Institution on 2008-09-29.

This part of the standard should be read in conjunction with SLS 1326: Sri Lanka Standard Tamil Character Code for Information Interchange.

Tamil collation has similarities with other Indic languages which follow the Sanskrit collation order. From the 16th century to the early 20th century most Tamil dictionaries followed the Sanskrit collation sequence which includes the Grantha letters (especially ஜ - JA) in between the Tamil letters. However most dictionaries and scholars follow the unique collation sequence which collates the Grantha letters after all Tamil letters and which has been mostly accepted as the de facto standard among Tamil communities.

A Tamil collation sequence is needed to set up databases and other collections of information in Tamil. The assistance provided by the Information and Communication Technology Agency of Sri Lanka and the University of Moratuwa in the preparation of this standard is gratefully acknowledged.

1 SCOPE

This standard prescribes the collation sequence for arranging a list of words or phrases in the Tamil language.

2 DEFINITIONS

2.1 collation: Collation is the process of arranging a list of words or phrases in a standard order.

3 COLLATION SEQUENCE

This standard defines the collation sequence for use in compiling dictionaries, other scholarly works, use in data processing and other activities on lists of personal and other names. The contemporary Tamil script contains following elements in its systems, which needed to be collated.

- i) vowel, e.g. அ, ஓள,
- ii) Tamil pure-consonant, e.g. க், ங்,
- iii) Grantha pure-consonant, e.g. ஸ், ஷ், ஜ்,
- iv) Tamil and Grantha vowel-consonant syllables, e.g. க, செ, ஸ, டே, ஸ.
- v) ஃப் (F) and vowel-consonant syllables of ஃப்
- vi) Special letter – āytam – ஃ,
- vii) Conjunct syllable - (Sri) – ஸ்ரீ,
- viii) Tamil Symbols, e.g. உ.மீ. (ஸ்),
- ix) Tamil numerals, e.g. ச, கூ, யி, ஈ, சூ,

This collation is the canonical collation order, and collated in the following order:

அ, ஆ, இ, ஈ, உ, ஊ எ, ஏ, ஐ, ஒ, ஓ, ஔ

∴

க், க, கா, கி, கீ, கு, கூ, கெ, கே, கை, கொ, கோ, கௌ

ஐ, வ, மீ, (வ்) யு, ஸ, ஹை, ழ, நீ

0, க, உ, ன, ச, ழ, கூ, எ, அ, கூ, ஓ, ன, சூ

NOTES:

1. The vowel ஒள may represent using an AU length mark (ௌ) as ஒ (0B92) + ள (0BD7). This form of sequence is not used according to SLS 1326. If this form appears it should be collated with 0B94 (ஒள).

2. The representation of a syllable such as கொள by a consonant character (க) followed by more than one vowel sign (ெ + ள) is permitted in Unicode, but is not allowed in SLS 1326 standard. If this form appears it should collated with relevant one vowel sign formation.

e.g. க + ளோ = க + ெ + ள
க + ெள = க + ெ + ள
க + ெள = க + ெ + ள

3. The Anusvara (◌̣) is encoded (0B82) in the Unicode standard to map along with the other Indic scripts. However, the Anusvara is not used in contemporary Tamil and is not included in the collation algorithm, but can be collated after all the letters.

4. ழ does not get a separate place in the collation order. It will be collated after words beginning with ழழ and before words beginning with ழழ.

If ழ formed from the ழ letter (permitted in old Unicode versions) as follows

ழ = 0BB8 0BCD 0BB0 0BC0 (ழ ழ ழ – Not allowed)

It will be also collated after words beginning with ழழ and before words beginning with ழழ.

5. Two systems were used to write the Tamil numerals. While one system does not have the Tamil digit 0 the other does have it. Both systems are acceptable.

0, க, ௨, ௩, ௪, ௫, ௬, ௭, ௮, ௯, ௧௦, ௧௧, ௧௨, ..., ௨௧, ௨௦, ..., ௧௧, ௧௦௦, ..., ௧௧, ௧௦௦௦, ...

If both systems represent the same value, it will be getting equal position in the collation

e.g. 10 = ௧௦ = ௧0
100 = ௧௦௦ = ௧00
1000 = ௧௦௦௦ = ௧000
201 = ௨௦௧ = ௨0௧

SLS CERTIFICATION MARK

The Sri Lanka Standards Institution is the owner of the registered certification mark shown below. Beneath the mark, the number of the Sri Lanka Standard relevant to the product is indicated. This mark may be used only by those who have obtained permits under the SLS certification marks scheme. The presence of this mark on or in relation to a product conveys the assurance that they have been produced to comply with the requirements of the relevant Sri Lanka Standard under a well designed system of quality control inspection and testing operated by the manufacturer and supervised by the SLSI which includes surveillance inspection of the factory, testing of both factory and market samples.

Further particulars of the terms and conditions of the permit may be obtained from the Sri Lanka Standards Institution, 17, Victoria Place, Elvitigala Mawatha, Colombo 08.

SRI LANKA STANDARDS INSTITUTION

The Sri Lanka Standards Institution (SLSI) is the National Standards Organization of Sri Lanka established under the Sri Lanka Standards Institution Act No. 6 of 1984 which repealed and replaced the Bureau of Ceylon Standards Act No. 38 of 1964. The Institution functions under the Ministry of Science & Technology.

The principal objects of the Institution as set out in the Act are to prepare standards and promote their adoption, to provide facilities for examination and testing of products, to operate a Certification Marks Scheme, to certify the quality of products meant for local consumption or exports and to promote standardization and quality control by educational, consultancy and research activity.

The Institution is financed by Government grants, and by the income from the sale of its publications and other services offered for Industry and Business Sector. Financial and administrative control is vested in a Council appointed in accordance with the provisions of the Act.

The development and formulation of National Standards is carried out by Technical Experts and representatives of other interest groups, assisted by the permanent officers of the Institution. These Technical Committees are appointed under the purview of the Sectoral Committees which in turn are appointed by the Council. The Sectoral Committees give the final Technical approval for the Draft National Standards prior to the approval by the Council of the SLSI.

All members of the Technical and Sectoral Committees render their services in an honorary capacity. In this process the Institution endeavours to ensure adequate representation of all view points.

In the International field the Institution represents Sri Lanka in the International Organization for Standardization (ISO), and participates in such fields of standardization as are of special interest to Sri Lanka.
